

Microbiome Management at Your Fingertips

KYTOS brings you revolutionary new services that empowers you with management tools to safeguard your cultivation from microbial threats.

We offer:

- ✦ Microbial health indicators that are continuously optimized via machine learning
- ✦ Quantitative data on bacterial load, algae taxonomy, bacterial diversity, and many more!
- ✦ A full service for your microbial analyses
- ✦ Accurate and rapid analysis
- ✦ Check out www.kytos.be for an overview of all our parameters.

All it takes is One Small Sample!

- ✦ 1 mL of water is all we need
- ✦ Biosecure and stable water samples
- ✦ Delivery and pick-up arranged for you
- ✦ Easy and quick sampling protocol: < 10 seconds/sample

Digital Farm Support Tools

- ✦ Microbial health and farm management tools
- ✦ Secure access to your health reports via your cloud account
- ✦ Tailor-made reports and advice
- ✦ KYTOS KytoApp

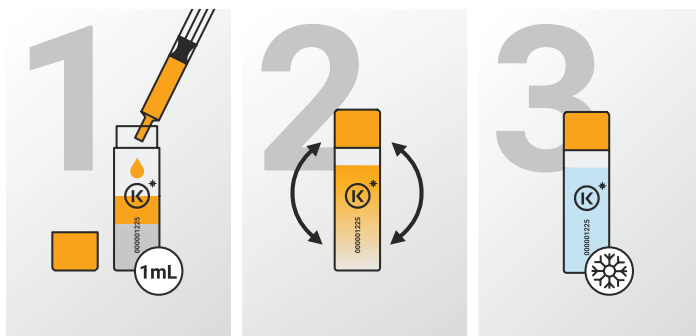

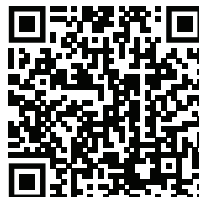

TYPE	SYSTEM	DATE	HEALTH	PRODUCTIVITY

KYTO *vial*

INSTRUCTIONS FOR USE

The sampling vials contain small amounts of chemical agents that may present health hazards. You can access the safety data sheet (SDS) through the QR code. Please read the provided SDS carefully prior to use. Contact info@kytos.be if you are unable to access the SDS.

- 1 **Approximately 1mL of sample** is transferred into the vial.
- 2 Close and **gently shake** the vial.
- 3 Samples can be stored cooled (4°C - 10°C) for up to **6 months** until analysis.

Notes

- * There is only a small volume of bactericidal solution in each vial - do not be alarmed if the vials appear empty.
- * Contact KYTOS if you are unsure about the sampling process.
